Easy to Clean Air Filter
Front Access

FEATURES & BENEFITS

■ Equipped with easy-to-clean Air Filter

The accumulation of dust in the condenser causes failures or breakdowns in refrigeration. Refrigeration operate normally until they accumulate a certain amount of dust. When they reach their limit, performance will drop rapidly, resulting in damages and possible disposal of stored goods. This is why all refrigeration manufacturers require the condenser to be cleaned at least once a month for warranty to remain valid. With Turbo Air, this process is simple and easy due to the frontal access air filter device. Pull out the filter and vacuum lightly to remove the dust. Place it back into position when complete.

■ Hydrocarbon refrigerants (R-290 / R-600a)

With innovative and eco-friendly technology, Turbo Air brings you hydrocarbon refrigerators designed to meet DOE's Energy Conservation Standards in 2017 and to use EPA's SNAP Program approved HC refrigerants. Hydrocarbon refrigerants do not deplete the ozone layer and have very low contribution to global warming (ODP-0, GWP-3).

■ Ergonomically designed doors

Customers' fatigue fades away with easy grip handles and doors that open effortlessly. These features along with self-closing doors make this the ultimate choice in customer convenience.

■ Stainless steel countertop and interior

The exterior of the cabinet is constructed with heavy gauge reinforced stainless steel countertop and wear-resistant black vinyl coated galvanized steel. The interior is painted galvanized steel with reinforced stainless steel floor. Turbo Air Back Bar model guarantees the utmost in cleanliness and long product life. It also adds a touch of style to the most refined setting.

■ Digital Temperature Controller

External digital temperature control has an easily accessible panel to quickly adjust temperatures, which includes a defrost control.

■ Forced air cooling system

Fast cooling and balanced temperature throughout the cabinet.

■ LED interior lighting

■ Double pane glass doors with Low-E glass (SGD Models)

■ High-density polyurethane insulation

The entire cabinet structure is foamed-in-place using high density, HCFC free polyurethane insulation.

■ Adjustable, heavy duty, PE (polyethylene) coated wire shelves

■ Side mount compressor unit

With compressors positioned on the side of the unit, our refrigerators can now be serviced without being moved. Our innovative, front air intake feature also allows this model to be highly efficient in narrow spaces.

■ Refrigerator holds 33°F ~ 38°F for the best in beverage preservation
